

ABOUT HERITAGE GUARD

FIRST LEGO League Challenge · UNEARTHED Season

PROJECT OVERVIEW

Heritage Guard is a digital app designed to help archaeologists, museum workers, and security staff document, track, and protect artifacts at dig sites and in museums. It addresses real problems faced in archaeology: artifacts getting lost, damaged during transport, or stolen, and the difficulty of keeping accurate records.

THE PROBLEM

- Theft and missing items at dig sites and museums
- Damage during transport when artifacts are moved
- Artifacts getting lost due to unclear location records
- Hard-to-keep records when many people handle the same objects

OUR SOLUTION

- Document artifacts with photos and unique codes
- Track status: OK, Broken, or Stolen
- Record location and movement history
- Use condition checklists for damaged items
- Maintain a watchlist for high-value pieces
- Add team notes and generate problem reports

THE PROBLEM

- Theft and missing items at dig sites and museums
- Damage during transport when artifacts are moved
